UPDATE 70

NEW FEATURES

WhatsApp

- The **MAXIMUS** controller can now send alerts via WhatsApp, a very reliable messaging service widely used around the world.

Shade Curtains

- It is now possible to gradually retract the curtain at night to compensate for high relative humidity.

- A new option allows the automatic deployment of the curtain when solar radiation is too high. Up to 6 steps can be programmed.

Wind Compensation

- To better benefit from natural ventilation, the compensation will stop above a configurable temperature limit. And, for security reasons in case of strong winds, another configurable parameter will close curtains to 0%.

Manure Handling

- Enhanced manure handling program that can manage independently the agitator and pump in the interim holding tank before manure gets pumped into the long-term storage tank.

And much more!
